Please add the following new Claim:

NEW CLAIM

15. A bodyboard structure, comprising:

a base board formed of a foamed material and having an upper surface, a bottom surface and a plurality of outer edge surfaces;

a base plate bonded to said bottom surface of said base board, said base plate having a stiffness greater than a stiffness of said base board;

a first plastic film layer directly and entirely encompassing an outer periphery of the bonded base board and base plate; and,

a second plastic film layer overlaying a lower surface of said base plate.
